VETERINARY DIET FORMULAS

We know that therapeutic diets can make a difference in the lives of cats and dogs. With this expertise, we've applied our science-based research to develop a line of Veterinary-Exclusive products. Our Veterinary-Exclusive diets support health issues such as: Food Allergies, Digestive Disorders or Gastrointestinal Disease, and Illness and Surgery Recovery Support. These formulas are highly palatable and some are offered in both wet and dry formulas. Below is a list of Royal Canin's Veterinary-Exclusive formulas appropriate for growing patients.

| ROYAL CANIN® Formula Name | Unit Size | Formula Description | Additional Benefits | Sample Image |
|---|----------------------|---|--|---|
| CANINE HYDROLYZED PROTEIN HP DRY | 7.7 lb | Dietary Elimination Trial and Adverse Food Reactions with Dermatological and/or Gastrointestinal Signs <ul style="list-style-type: none"> Hydrolyzed soy protein, composed of low molecular weight peptides, is highly digestible and has very low antigenic potential Single starch source: rice Optimal amounts of B vitamins and amino acids help maintain the skin's natural barrier effect |  |  |
| | 17.6 lb | | | |
| | 25.3 lb | | | |
| FELINE SELECTED PROTEIN PD (duck) PR (rabbit) PV (venison) | 5.1 oz can (PD & PR) | Dietary Elimination Trial and Adverse Food Reactions with Dermatological and/or Gastrointestinal Signs <ul style="list-style-type: none"> Protein source: duck, rabbit or venison Additional protein source: hydrolyzed soy Single starch source: pea |  |  |
| | 8.8 lb (PD, PR, PV) | | | |
| | 17.6 lb (PD) | | | |
| CANINE SKIN SUPPORT | 6 lb | Atopy and Other Causes of Dermatitis <ul style="list-style-type: none"> Supplemented with curcumin, aloe vera, vitamin C and taurine to help wound healing, decrease secondary bacterial infections and decrease pruritus Optimal amounts of B vitamins and amino acids help maintain the skin's natural barrier effect |  |  |
| | 16.5 lb | | | |
| | 32 lb | | | |
| GASTROINTESTINAL PUPPY™ | 5.1 oz can | Acute and Chronic Gastroenteritis in Puppies <ul style="list-style-type: none"> A combination of highly digestible proteins, prebiotics and EPA and DHA helps support digestive health Formulated to fulfill the nutritional needs of growing puppies A high energy content allows for a reduction in meal volume and a decreased intestinal load Kibbles rehydrate easily in warm water to increase palatability and facilitate food intake |  |  |
| | 8.8 lb | | | |
| | 22 lb | | | |
| GASTROINTESTINAL KITTEN™ | 5.1 oz can | Acute and Chronic Gastroenteritis in Kittens <ul style="list-style-type: none"> A combination of highly digestible proteins, prebiotics and EPA and DHA helps support digestive health Formulated to fulfill the nutritional needs of growing kittens A high energy content allows for a reduction in meal volume and a decreased intestinal load Kibbles rehydrate easily in warm water to increase palatability and facilitate food intake |  |  |
| | 12 oz | | | |
| | 4.4 lb | | | |
| | 7.7 lb | | | |
| RECOVERY Ultra Soft Mousse in Sauce | 5.8 oz can | Critical Illness and Postsurgical Care <ul style="list-style-type: none"> High energy density utilizing dietary fat to improve palatability and reduce feeding volumes Special texture designed to facilitate tube feeding without the need to dilute for larger tube sizes Enriched with EPA and DHA to help modulate inflammatory reactions |   |  |
